Radio licence application for unmanned aircraft systems

UAS

Customer information	Full name of customer		Finnish social security number / Finnish business ID-number / Customer number at Traficom
	Delivery address		Postcode and post office
	Telephone	E-mail address	
	Contact person for licence matters	Telephone	E-mail address
Common information for the licence	Validity period of the licence (dd.mm.yyyy – dd.mm.yyyy)		
	Number of UAVs	Flying area	Maximum flying altitude (m)
	Additional information on the services or transmitting stations		
Payer information (if different from the customer information)	Name of payer		
	Finnish business ID-number / Finnish social security number		
	Telephone	E-mail address	
	Delivery address		Postcode and post office
E-invoicing information (not applicable to consumer customers)	**Note!** If you provide e-invoicing information, all invoices related to the same customer number will be delivered as e-invoices in the future.		
	E-invoicing address / EDI code		E-invoicing operator / Operator code
Invoice reference	Customer-selected invoice reference (max 35 characters)		

Please, fill in the technical information below, and on the page 2, according to the purpose of service. Page 2 may be duplicated, if necessary.

1) Information on the service	Purpose of service ☐ Command and Control ☐ Flight Termination ☐ Other, which:		
	Service to be used ☐ on the ground ☐ in an UAV	Number of independent transmitting stations [1] on the ground:	in each UAV:
	Frequency or frequency range (MHz)	The ground-based station is movable; ☐ Yes ☐ No	is transmitting on the move ☐ Yes ☐ No
	Channel width (kHz)	Number of channels in equipment	Number of channels required
	When multiple frequency ranges or separate transmitting and receiving frequencies are required, necessary gap between ranges; or between transmitting and receiving frequencies (kHz)		
	Transmitter power (W)	Antenna gain (dBi)	Modulation (e.g. FM, GMSK, FHSS)
	Type designation and length of antenna cable (m) or attenuation (dB)		Radiated power (W EIRP)
Location of the ground based station	Antenna height above ground level (m)	Coordinates (ETRS-TM35FIN) (longitude/x ; latitude/y)	

[1] 'An independent transmitting station' is a system where a transmitter is connected to an antenna by a transmission line. If several independent transmitting stations are located in the very same place this set-up is regarded as one independent transmitting station. In this radio licence application, the applicant is requested to indicate the number of independent transmitting stations located in different places.
